

Airport Quality Management Systems Training Course

Professional Development Training Course Outline

Category	Aviation and Airport Management	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Airport Quality Management Systems Training Course is designed to provide aviation professionals with advanced knowledge and practical skills in developing, implementing, auditing, and continuously improving quality management frameworks within airport environments. The course focuses on aviation quality assurance, operational excellence, safety performance management, regulatory compliance, process optimization, customer experience improvement, and international airport standards. Participants will gain insights into quality management principles aligned with global aviation requirements, including ICAO standards, ISO quality frameworks, risk-based thinking, performance monitoring, and continuous improvement methodologies.

Modern airports operate within highly complex ecosystems requiring robust quality management systems to ensure safe, efficient, and customer-focused operations. This training course equips participants with strategic tools for quality governance, internal auditing, corrective action management, service improvement, and data-driven decision-making. Through international case studies and practical applications, participants will learn how leading airports achieve operational reliability, enhanced passenger satisfaction, regulatory compliance, and sustainable aviation excellence.

Programme Curriculum

Airport Quality Management Systems Training Course

Introduction

Airport Quality Management Systems Training Course is designed to provide aviation professionals with advanced knowledge and practical skills in developing, implementing, auditing, and continuously improving quality management frameworks within airport environments. The course focuses on aviation quality assurance,

operational excellence, safety performance management, regulatory compliance, process optimization, customer experience improvement, and international airport standards. Participants will gain insights into quality management principles aligned with global aviation requirements, including ICAO standards, ISO quality frameworks, risk-based thinking, performance monitoring, and continuous improvement methodologies.

Modern airports operate within highly complex ecosystems requiring robust quality management systems to ensure safe, efficient, and customer-focused operations. This training course equips participants with strategic tools for quality governance, internal auditing, corrective action management, service improvement, and data-driven decision-making. Through international case studies and practical applications, participants will learn how leading airports achieve operational reliability, enhanced passenger satisfaction, regulatory compliance, and sustainable aviation excellence.

Course Objectives

By the end of this course, participants will be able to:

1. Understand advanced airport quality management systems and aviation quality assurance frameworks.
2. Apply ISO-based quality management principles within airport operational environments.
3. Develop effective quality policies, procedures, and performance measurement systems.
4. Implement continuous improvement strategies using modern quality methodologies.
5. Conduct airport quality audits and compliance assessments effectively.
6. Apply risk-based quality management approaches for airport operations.
7. Improve airport service quality and passenger experience standards.
8. Establish corrective and preventive action systems for operational improvement.
9. Utilize quality performance indicators and analytics for decision-making.
10. Strengthen regulatory compliance with international aviation requirements.
11. Develop effective quality governance and leadership practices.
12. Integrate safety, security, and quality management systems.
13. Promote a culture of operational excellence and continuous improvement.

Organizational Benefits

1. Improved airport operational efficiency and service reliability.
2. Enhanced compliance with aviation regulations and international standards.
3. Reduced operational risks, failures, and service disruptions.
4. Increased passenger satisfaction and stakeholder confidence.
5. Stronger quality governance and performance management culture.
6. Improved audit readiness and regulatory performance.
7. Better decision-making through quality data analytics.
8. Enhanced employee accountability and process ownership.
9. Improved integration between safety, security, and quality systems.
10. Sustainable improvement of airport competitiveness.

Target Audiences

1. Airport quality managers and quality assurance professionals.
2. Airport operations managers and supervisors.

3. Aviation safety and compliance officers.
4. Airport terminal and customer service managers.
5. Airline ground handling and service providers.
6. Civil aviation authority representatives.
7. Airport consultants and aviation project managers.
8. Aviation executives and leadership teams.

Course Duration: 5 days

Course Modules

Module 1: Fundamentals of Airport Quality Management Systems

- Introduction to airport quality management principles and aviation excellence frameworks.
- Understanding quality assurance, quality control, and continuous improvement concepts.
- Overview of ICAO quality requirements and international aviation standards.
- Establishing airport quality objectives, policies, and governance structures.
- Developing quality-driven airport operational cultures.
- Case study: Quality management transformation at Singapore Changi Airport.

Module 2: Airport Quality Standards and Regulatory Compliance

- Understanding global aviation quality regulations and compliance requirements.
- Implementing ISO 9001 principles within airport operations.
- Managing regulatory inspections and quality documentation systems.
- Aligning airport processes with international benchmarking practices.
- Developing compliance monitoring frameworks.
- Case study: Regulatory compliance practices at Dubai International Airport.

Module 3: Quality Auditing and Performance Evaluation

- Planning and conducting effective airport quality audits.
- Developing audit checklists, procedures, and evaluation criteria.
- Identifying non-conformities and improvement opportunities.
- Managing audit findings through corrective action processes.
- Measuring quality performance using key performance indicators.
- Case study: Airport audit excellence practices at Heathrow Airport.

Module 4: Risk Management and Quality Improvement Strategies

- Integrating risk-based thinking into airport quality systems.
- Identifying operational risks affecting airport service quality.
- Applying root cause analysis and problem-solving techniques.

- Developing preventive and corrective improvement strategies.
- Using quality tools for operational optimization.
- Case study: Risk management improvements at Amsterdam Schiphol Airport.

Module 5: Customer Experience and Service Quality Management

- Understanding passenger expectations and airport service standards.
- Measuring customer satisfaction through quality indicators.
- Improving passenger journey processes and service delivery.
- Managing complaints and feedback systems effectively.
- Creating customer-focused airport quality frameworks.
- Case study: Passenger experience initiatives at Hamad International Airport.

Module 6: Integrated Quality, Safety, and Security Management

- Understanding integration between quality, safety, and security systems.
- Developing coordinated aviation management frameworks.
- Improving communication between airport operational departments.
- Managing safety-related quality performance indicators.
- Supporting a culture of safety and operational excellence.
- Case study: Integrated management systems at Hong Kong International Airport.

Module 7: Quality Leadership and Continuous Improvement Culture

- Developing leadership approaches for quality-driven organizations.
- Building employee engagement in airport quality initiatives.
- Applying Lean management and process improvement methods.
- Managing organizational change through quality strategies.
- Creating sustainable improvement programs.
- Case study: Operational excellence practices at Munich Airport.

Module 8: Quality Management System Implementation and Future Trends

- Designing effective airport quality management implementation plans.
- Using technology and analytics for quality monitoring.
- Exploring digital transformation in airport quality management.
- Developing future-ready airport quality strategies.
- Reviewing global trends in aviation quality excellence.
- Case study: Smart airport quality innovation at Seoul Incheon Airport.

Training Methodology

- Interactive instructor-led sessions covering airport quality management concepts.
- Practical workshops focused on quality system development and implementation.
- International airport case studies demonstrating real operational challenges.
- Group discussions and problem-solving exercises for quality improvement scenarios.
- Quality audit simulations and performance assessment activities.
- Application of aviation quality tools, frameworks, and industry best practices.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
28 Sep 2026	02 Oct 2026	Online	\$1,000
28 Sep 2026	02 Oct 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$0

Start Date	End Date	Location	Price
28 Sep 2026	02 Oct 2026	Physical	\$0
28 Sep 2026	02 Oct 2026	Physical	\$0
28 Sep 2026	02 Oct 2026	Physical	\$0
28 Sep 2026	02 Oct 2026	Physical	\$0
28 Sep 2026	02 Oct 2026	Physical	\$0
