Green Accounting Training Course

Professional Development Training Course Outline

Category	ACCOUNTING & FINANCE	**Duration**	10 Days
Base Fee	$3,000 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Green Accounting Training is a comprehensive sustainability-focused program designed to equip professionals with the knowledge and practical skills required to integrate environmental accounting, ESG reporting, and sustainable financial management into modern organizational systems. As global businesses shift toward climate accountability and carbon neutrality, green accounting has become a critical driver of transparency, regulatory compliance, and long-term value creation.

Green Accounting Training Course provides an in-depth understanding of environmental cost accounting, carbon footprint measurement, natural capital valuation, and sustainability reporting frameworks such as IFRS Sustainability Disclosure Standards and Global Reporting Initiative (GRI). Participants will gain practical insights into how organizations can align financial performance with environmental responsibility while meeting global ESG compliance requirements.

Programme Curriculum

Green Accounting Training Course

Introduction

Green Accounting Training is a comprehensive sustainability-focused program designed to equip professionals with the knowledge and practical skills required to integrate environmental accounting, ESG reporting, and sustainable financial management into modern organizational systems. As global businesses shift toward climate accountability and carbon neutrality, green accounting has become a critical driver of transparency, regulatory compliance, and long-term value creation.

Green Accounting Training Course provides an in-depth understanding of environmental cost accounting, carbon footprint measurement, natural capital valuation, and sustainability reporting frameworks such as IFRS Sustainability Disclosure Standards and Global Reporting Initiative (GRI). Participants will gain practical insights

into how organizations can align financial performance with environmental responsibility while meeting global ESG compliance requirements.

Course Objectives

1. Understand core principles of green accounting and environmental financial reporting
2. Apply ESG (Environmental, Social, Governance) frameworks in accounting systems
3. Analyze carbon accounting methodologies and greenhouse gas (GHG) tracking
4. Implement sustainability reporting standards such as GRI and IFRS S1 & S2
5. Integrate environmental cost management into financial decision-making
6. Develop skills in natural resource valuation and ecological economics
7. Evaluate corporate environmental performance using sustainability KPIs
8. Enhance transparency in environmental disclosure and reporting systems
9. Support organizational compliance with global climate regulations
10. Promote sustainable business strategies and green finance integration
11. Identify environmental liabilities and eco-efficiency opportunities
12. Improve decision-making using environmental risk assessment tools
13. Strengthen corporate sustainability governance and accountability

Organizational Benefits

- Improved ESG compliance and global reporting alignment
- Enhanced corporate reputation and stakeholder trust
- Better environmental risk management and mitigation
- Increased operational efficiency through resource optimization
- Stronger access to green financing and sustainability investments
- Reduced carbon footprint and environmental liabilities
- Improved regulatory compliance with international standards
- Data-driven sustainability performance tracking
- Competitive advantage in sustainable markets
- Long-term financial resilience through green transformation

Target Audiences

- Finance managers and accountants
- Sustainability and ESG officers
- Environmental auditors and consultants
- Corporate strategy professionals
- Government policy and regulatory officers
- NGO and climate advocacy professionals
- Business analysts and financial planners
- University students in accounting and environmental studies

Course Duration: 10 days

Course Modules

Module 1: Introduction to Green Accounting

- Definition and evolution of green accounting
- Importance of sustainability in financial systems
- Integration of environmental costs in accounting
- Overview of global green finance trends
- Case Study: Corporate sustainability adoption in Scandinavian countries
- Role of green accounting in modern business transformation

Module 2: Environmental Cost Accounting

- Identifying direct and indirect environmental costs
- Cost allocation for environmental impacts
- Pollution and waste cost measurement
- Environmental cost reporting frameworks
- Case Study: Waste cost management in Japanese manufacturing firms
- Application in industrial sustainability reporting

Module 3: ESG Reporting Frameworks

- Understanding ESG principles
- Structure of ESG reporting standards
- Investor expectations in ESG disclosures
- ESG scoring and rating systems
- Case Study: Tesla ESG reporting evolution
- Linking ESG with corporate performance

Module 4: Carbon Accounting and GHG Emissions

- Scope 1, 2, and 3 emissions tracking
- Carbon footprint measurement techniques
- Emission reduction strategies
- Carbon credit systems and trading
- Case Study: EU Emissions Trading System (EU ETS)
- Corporate carbon neutrality strategies

Module 5: Sustainability Reporting Standards

- Introduction to GRI standards
- IFRS Sustainability Disclosure Standards (S1 & S2)

- Integrated reporting frameworks
- Data collection for sustainability reports
- Case Study: Unilever sustainability reporting model
- Global compliance requirements

Module 6: Natural Capital Accounting

- Concept of natural capital
- Valuation of ecosystems and biodiversity
- Environmental asset classification
- Resource depletion accounting
- Case Study: Costa Rica forest conservation accounting
- Application in national accounting systems

Module 7: Green Finance and Investment

- Principles of green finance
- Sustainable investment instruments
- Green bonds and climate funds
- Risk assessment in green investments
- Case Study: World Bank green bond program
- Impact investment strategies

Module 8: Environmental Risk Management

- Identifying environmental risks
- Risk quantification models
- Climate-related financial risks
- Mitigation strategies in organizations
- Case Study: Flood risk management in Netherlands industries
- Integration into corporate governance

Module 9: Corporate Sustainability Strategy

- Building sustainable business models
- Strategic environmental planning
- Stakeholder engagement strategies
- Long-term sustainability goals
- Case Study: IKEA sustainability transformation
- Competitive advantage through sustainability

Module 10: Climate Change Accounting

- Financial implications of climate change
- Climate risk disclosure requirements
- Adaptation vs mitigation accounting
- Climate scenario analysis
- Case Study: California climate disclosure regulations
- Business continuity planning

Module 11: Environmental Auditing

- Principles of environmental auditing
- Audit tools and techniques
- Compliance verification systems
- Reporting audit findings
- Case Study: ISO 14001 certification audits in Germany
- Role in regulatory compliance

Module 12: Sustainable Supply Chain Accounting

- Supply chain sustainability metrics
- Environmental impact tracking in logistics
- Supplier ESG evaluation
- Circular economy integration
- Case Study: Amazon sustainable logistics initiative
- Green procurement strategies

Module 13: Renewable Energy Accounting

- Accounting for renewable energy projects
- Cost-benefit analysis of renewables
- Energy efficiency reporting
- Incentives and subsidies tracking
- Case Study: Solar energy accounting in India
- Transition to low-carbon economies

Module 14: Digital Tools for Green Accounting

- Software for sustainability reporting
- Data analytics in environmental accounting
- AI in ESG reporting systems
- Blockchain in carbon tracking
- Case Study: Microsoft sustainability cloud platform

- Automation in green reporting

Module 15: Global Sustainability Governance

- International environmental regulations
- UN Sustainable Development Goals (SDGs) alignment
- Corporate governance frameworks
- Policy compliance strategies
- Case Study: UN climate governance initiatives
- Future trends in global sustainability

Training Methodology

- Interactive lectures and expert-led presentations
- Real-world case study analysis
- Group discussions and peer learning sessions
- Practical exercises and scenario simulations
- ESG reporting workshops and templates practice
- Industry benchmarking and comparative analysis

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.
f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
23 Nov 2026	04 Dec 2026	Online	$2,000
23 Nov 2026	04 Dec 2026	Physical	$3,000
23 Nov 2026	04 Dec 2026	Physical	$6,000
23 Nov 2026	04 Dec 2026	Physical	$6,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
23 Nov 2026	04 Dec 2026	Physical	$9,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
