

# Machine Learning for Communication Insights Training Course

Professional Development Training Course Outline

|          |                  |               |                         |
|----------|------------------|---------------|-------------------------|
| Category | General Training | Duration      | 10 Days                 |
| Base Fee | \$3,000 USD      | Delivery Mode | Online / On-site Hybrid |

## Course Introduction

In today's data-driven communication landscape, organizations generate massive volumes of structured and unstructured data through digital platforms, social media channels, customer interactions, emails, chatbots, surveys, and enterprise communication systems. Machine Learning (ML) has emerged as a transformative technology that enables organizations to extract actionable communication insights, predict audience behavior, optimize engagement strategies, and enhance decision-making processes. By leveraging Artificial Intelligence (AI), Natural Language Processing (NLP), Predictive Analytics, Sentiment Analysis, and Generative AI, communication professionals can uncover hidden patterns, identify emerging trends, and improve stakeholder engagement with unprecedented accuracy.

Machine Learning for Communication Insights Training Course equips participants with practical and strategic knowledge to apply Machine Learning techniques in communication intelligence and analytics. Participants will explore advanced concepts such as Deep Learning, Large Language Models (LLMs), Conversational AI, Social Listening Analytics, Customer Experience Intelligence, Media Monitoring Automation, and Data-Driven Communication Strategies. Through real-world case studies, hands-on projects, and industry best practices, learners will develop the competencies needed to transform communication data into measurable business value and strategic insights.

## Programme Curriculum

### Machine Learning for Communication Insights Training Course

#### Introduction

In today's data-driven communication landscape, organizations generate massive volumes of structured and unstructured data through digital platforms, social media channels, customer interactions, emails, chatbots, surveys, and enterprise communication systems. Machine Learning (ML) has emerged as a transformative

technology that enables organizations to extract actionable communication insights, predict audience behavior, optimize engagement strategies, and enhance decision-making processes. By leveraging Artificial Intelligence (AI), Natural Language Processing (NLP), Predictive Analytics, Sentiment Analysis, and Generative AI, communication professionals can uncover hidden patterns, identify emerging trends, and improve stakeholder engagement with unprecedented accuracy.

Machine Learning for Communication Insights Training Course equips participants with practical and strategic knowledge to apply Machine Learning techniques in communication intelligence and analytics. Participants will explore advanced concepts such as Deep Learning, Large Language Models (LLMs), Conversational AI, Social Listening Analytics, Customer Experience Intelligence, Media Monitoring Automation, and Data-Driven Communication Strategies. Through real-world case studies, hands-on projects, and industry best practices, learners will develop the competencies needed to transform communication data into measurable business value and strategic insights.

### **Course Duration**

10 days

### **Course Objectives**

By the end of this training, participants will be able to:

1. Understand Machine Learning fundamentals and AI-driven communication analytics.
2. Apply Natural Language Processing (NLP) techniques for communication intelligence.
3. Utilize Sentiment Analysis to evaluate customer and stakeholder perceptions.
4. Implement Predictive Analytics for audience behavior forecasting.
5. Leverage Generative AI and Large Language Models (LLMs) for communication optimization.
6. Develop Social Media Analytics frameworks using machine learning algorithms.
7. Automate communication monitoring through AI-powered tools.
8. Analyze customer experience data using advanced data science techniques.
9. Build communication dashboards using Business Intelligence and Data Visualization tools.
10. Detect misinformation, fake news, and reputation risks using AI models.
11. Design communication recommendation systems and personalization strategies.
12. Measure communication campaign effectiveness using predictive performance metrics.
13. Develop end-to-end communication insight projects using modern machine learning platforms.

### **Target Audience**

1. Communication Managers
2. Public Relations Professionals
3. Corporate Affairs Officers
4. Marketing and Digital Marketing Specialists
5. Social Media Managers
6. Customer Experience Professionals
7. Data Analysts and Business Intelligence Professionals
8. Government, NGO, and Development Communication Specialists

### **Course Modules**

#### **Module 1: Introduction to Machine Learning for Communication Insights**

- Fundamentals of AI, ML, and Communication Analytics

- Communication Data Ecosystems
- Structured vs Unstructured Communication Data
- Business Value of Communication Intelligence
- ML Use Cases in Communication
- **Case Study:** AI-driven communication intelligence transformation in multinational organizations.

## Module 2: Data Collection and Communication Data Sources

- Social Media Data Mining
- Customer Interaction Data
- Survey and Feedback Analytics
- Media Monitoring Data
- Communication Data Governance
- **Case Study:** Multi-channel communication data integration project.

## Module 3: Data Preparation and Feature Engineering

- Data Cleaning Techniques
- Text Normalization
- Data Transformation
- Feature Extraction Methods
- Communication Dataset Optimization
- **Case Study:** Preparing customer communication datasets for predictive modeling.

## Module 4: Natural Language Processing (NLP) for Communication Analytics

- NLP Fundamentals
- Text Classification
- Keyword Extraction
- Topic Modeling
- Named Entity Recognition
- **Case Study:** Automated analysis of customer feedback using NLP.

## Module 5: Sentiment Analysis and Emotion Detection

- Sentiment Classification Models
- Emotion Recognition Techniques
- Opinion Mining
- Brand Perception Analysis
- Stakeholder Sentiment Monitoring
- **Case Study:** Global brand sentiment analysis during a product launch.

## Module 6: Predictive Analytics for Audience Insights

- Predictive Modeling Fundamentals
- Audience Segmentation
- Engagement Prediction
- Communication Trend Forecasting
- Behavioral Analytics
- **Case Study:** Predicting customer engagement using machine learning algorithms.

## Module 7: Social Media Intelligence and Listening Analytics

- Social Listening Platforms
- Trend Detection
- Influencer Analytics
- Viral Content Prediction
- Real-Time Monitoring Systems
- **Case Study:** Social media trend forecasting during major events.

## **Module 8: Deep Learning for Communication Analysis**

- Neural Networks Basics
- Deep Learning Architectures
- Text Embeddings
- Transformer Models
- Communication Pattern Recognition
- **Case Study:** Deep learning applications in communication monitoring.

## **Module 9: Large Language Models (LLMs) and Generative AI**

- Introduction to LLMs
- Prompt Engineering
- Content Generation Automation
- AI-Assisted Communication Strategy
- Responsible AI Practices
- **Case Study:** Deploying Generative AI for customer communication support.

## **Module 10: Customer Experience and Communication Intelligence**

- Voice of Customer Analytics
- Customer Journey Intelligence
- Experience Measurement Frameworks
- Predictive Customer Insights
- Service Quality Analytics
- **Case Study:** AI-powered customer experience improvement initiative.

## **Module 11: Communication Campaign Performance Analytics**

- Campaign Measurement Metrics
- Attribution Modeling
- ROI Analysis
- Predictive Campaign Optimization
- Dashboard Development
- **Case Study:** Measuring digital campaign effectiveness using ML.

## **Module 12: Reputation Management and Risk Analytics**

- Crisis Communication Analytics
- Reputation Monitoring
- Misinformation Detection
- Brand Risk Assessment
- AI-Based Early Warning Systems
- **Case Study:** Reputation risk detection during organizational crises.

## Module 13: Data Visualization and Communication Dashboards

- Visualization Principles
- Interactive Dashboards
- Executive Reporting
- Storytelling with Data
- KPI Monitoring
- **Case Study:** Executive communication intelligence dashboard development.

## Module 14: Ethics, Governance, and Responsible AI

- AI Ethics Principles
- Data Privacy Regulations
- Bias Detection and Mitigation
- Explainable AI
- Governance Frameworks
- **Case Study:** Ethical deployment of AI communication systems.

## Module 15: Capstone Project – Communication Insights Implementation

- Problem Identification
- Data Collection Strategy
- Model Development
- Communication Insights Generation
- Project Presentation and Evaluation
- **Case Study:** End-to-end machine learning implementation for communication intelligence.

## Training Methodology

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

## Register as a group from 3 participants for a Discount

Send us an email: [info@fineskilltrainingcenter.org](mailto:info@fineskilltrainingcenter.org) or call +254769199797

## Certification

*Upon successful completion of this training, participants will be issued with a globally- recognized certificate.*

## Tailor-Made Course

*We also offer tailor-made courses based on your needs.*

## Key Notes

- a. The participant must be conversant with English.

- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

## Upcoming Scheduled Sessions

| Start Date  | End Date    | Location | Price   |
|-------------|-------------|----------|---------|
| 28 Sep 2026 | 09 Oct 2026 | Online   | \$2,000 |
| 28 Sep 2026 | 09 Oct 2026 | Physical | \$3,000 |
| 28 Sep 2026 | 09 Oct 2026 | Physical | \$0     |
| 28 Sep 2026 | 09 Oct 2026 | Physical | \$0     |
| 28 Sep 2026 | 09 Oct 2026 | Physical | \$0     |
| 28 Sep 2026 | 09 Oct 2026 | Physical | \$0     |
| 28 Sep 2026 | 09 Oct 2026 | Physical | \$0     |
| 28 Sep 2026 | 09 Oct 2026 | Physical | \$0     |
