

Media Monitoring and Analysis Training Course

Professional Development Training Course Outline

Category	General Training	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In today's hyper-digital ecosystem, Media Monitoring and Analysis has become a critical capability for organizations seeking to thrive in a data-driven, reputation-sensitive world. With the rapid rise of AI-powered analytics, social listening platforms, sentiment analysis, and real-time brand intelligence, businesses must continuously track, interpret, and respond to conversations across traditional and digital media channels. Media Monitoring and Analysis Training Course equips participants with advanced skills in media intelligence, digital listening, crisis detection, competitor tracking, and audience insights extraction using modern tools and methodologies.

As misinformation spreads faster and brand perception shifts in real-time, organizations require professionals who can transform raw media data into actionable insights. This course focuses on building expertise in social media monitoring, news analytics, influencer tracking, reputation management, and predictive media analytics. Participants will learn how to leverage AI-driven dashboards, data visualization tools, and sentiment scoring systems to support strategic communication, marketing intelligence, and decision-making in a competitive digital landscape.

Programme Curriculum

Media Monitoring and Analysis Training Course

Introduction

In today's hyper-digital ecosystem, Media Monitoring and Analysis has become a critical capability for organizations seeking to thrive in a data-driven, reputation-sensitive world. With the rapid rise of AI-powered analytics, social listening platforms, sentiment analysis, and real-time brand intelligence, businesses must continuously track, interpret, and respond to conversations across traditional and digital media channels. Media Monitoring and Analysis Training Course equips participants with advanced skills in media intelligence, digital listening, crisis detection, competitor tracking, and audience insights extraction using modern tools and

methodologies.

As misinformation spreads faster and brand perception shifts in real-time, organizations require professionals who can transform raw media data into actionable insights. This course focuses on building expertise in social media monitoring, news analytics, influencer tracking, reputation management, and predictive media analytics. Participants will learn how to leverage AI-driven dashboards, data visualization tools, and sentiment scoring systems to support strategic communication, marketing intelligence, and decision-making in a competitive digital landscape.

Course Duration

5 days
