PPP Project Development Facility Management Training Course

Professional Development Training Course Outline

Category	General Training	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Public-Private Partnership Project Development Facility Management Training Course provides a practical and strategic framework for professionals involved in the identification, preparation, structuring, appraisal, financing, procurement, implementation, and management of Public-Private Partnership projects. The course focuses on project development facilities, project preparation funds, feasibility studies, value-for-money assessment, financial modelling, risk allocation, bankability, infrastructure investment, and institutional governance. Participants will develop the technical capabilities required to transform infrastructure concepts into investment-ready Public-Private Partnership projects.

The training also examines international best practices in Public-Private Partnership project development facility management, including governance structures, funding mechanisms, project pipelines, transaction advisory processes, stakeholder engagement, procurement strategies, monitoring systems, and performance management. Through practical exercises and global case studies, participants will learn how successful Public-Private Partnership institutions manage project development resources, improve project quality, mobilize private capital, and accelerate sustainable infrastructure delivery.

Programme Curriculum

Public-Private Partnership Project Development Facility Management Training Course

Introduction

Public-Private Partnership Project Development Facility Management Training Course provides a practical and strategic framework for professionals involved in the identification, preparation, structuring, appraisal, financing, procurement, implementation, and management of Public-Private Partnership projects. The course focuses on project development facilities, project preparation funds, feasibility studies, value-for-money assessment, financial modelling, risk allocation, bankability, infrastructure investment, and institutional governance.

Participants will develop the technical capabilities required to transform infrastructure concepts into investment-ready Public-Private Partnership projects.

The training also examines international best practices in Public-Private Partnership project development facility management, including governance structures, funding mechanisms, project pipelines, transaction advisory processes, stakeholder engagement, procurement strategies, monitoring systems, and performance management. Through practical exercises and global case studies, participants will learn how successful Public-Private Partnership institutions manage project development resources, improve project quality, mobilize private capital, and accelerate sustainable infrastructure delivery.

Course Objectives

By the end of the course, participants will be able to:

1. Explain Public-Private Partnership project development facility concepts and functions.
2. Develop effective project preparation and investment strategies.
3. Conduct feasibility and bankability assessments.
4. Apply value-for-money and affordability analysis.
5. Develop Public-Private Partnership financial models.
6. Design effective project development funding mechanisms.
7. Allocate risks using international best practices.
8. Strengthen project governance and institutional frameworks.
9. Manage transaction advisory and procurement processes.
10. Evaluate project pipelines and investment readiness.
11. Apply sustainable infrastructure and climate-finance principles.
12. Monitor project development facility performance.
13. Improve private-sector investment mobilization and project delivery.

Organizational Benefits

- Improved quality and bankability of infrastructure projects.
- Stronger project preparation and investment decision-making.
- Better utilization of project development funds.
- Enhanced private-sector capital mobilization.
- Improved risk management and value for money.
- Stronger governance and institutional accountability.
- Faster movement of projects from concept to procurement.
- Improved infrastructure portfolio performance.

Target Audiences

1. Public-Private Partnership unit professionals.
2. Infrastructure development managers.
3. Project development facility managers.
4. Government policy and planning officials.
5. Finance and investment professionals.
6. Infrastructure project consultants and advisors.

7. Procurement and contract management professionals.
8. Development finance and private-sector representatives.

Course Duration: 5 days

Course Modules

- Institutional governance and operating models.
- Project pipeline development and prioritization.
- Funding sources and financial sustainability.
- Global case study: United Kingdom infrastructure project preparation practices.

Module 2: Project Identification and Screening

- Infrastructure needs assessment and opportunity identification.
- Public-Private Partnership suitability screening.
- Strategic alignment and development priorities.
- Initial technical and financial assessment.
- Investment-readiness criteria.
- Global case study: South Africa Public-Private Partnership project screening.

Module 3: Feasibility and Bankability Assessment

- Technical and commercial feasibility studies.
- Economic, social, and environmental assessments.
- Demand forecasting and market analysis.
- Bankability and investor requirements.
- Affordability and value-for-money analysis.
- Global case study: India infrastructure feasibility development.

Module 4: Financial Modelling and Funding

- Public-Private Partnership financial modelling principles.
- Capital expenditure and operating-cost projections.
- Revenue structures and tariff modelling.
- Funding, financing, and blended-finance mechanisms.
- Sensitivity and scenario analysis.
- Global case study: Kenya infrastructure financing structures.

Module 5: Risk Allocation and Project Structuring

- Identification and classification of project risks.
- Optimal public and private risk allocation.
- Risk mitigation and contingency planning.
- Contractual and financial risk considerations.
- Project structure and commercial viability.
- Global case study: Australia risk allocation practices.

Module 6: Transaction Advisory and Procurement

- Transaction advisory services and responsibilities.
- Procurement strategy and competitive processes.
- Request-for-proposal development.
- Bid evaluation and investor engagement.
- Negotiation and financial close preparation.
- Global case study: Philippines Public-Private Partnership procurement.

Module 7: Facility Governance and Performance Management

- Governance frameworks and accountability.
- Project development facility policies and procedures.
- Portfolio monitoring and performance indicators.
- Financial controls and resource management.
- Reporting, audit, and institutional transparency.
- Global case study: Canadian infrastructure project governance.

Module 8: Sustainable Infrastructure and Investment Mobilization

- Sustainable infrastructure development principles.
- Climate finance and environmental considerations.
- Private-sector and institutional investor mobilization.
- Development finance institution partnerships.
- Innovation, digitalization, and future infrastructure financing.
- Global case study: European infrastructure investment programs.

Training Methodology

- Instructor-led presentations and expert briefings.
- Interactive discussions and facilitated knowledge sharing.
- Practical Public-Private Partnership project-development exercises.

- Financial modelling, risk assessment, and case-based activities.
- Group workshops and project pipeline simulations.
- International case studies and comparative analysis.
- Scenario-based problem solving and decision-making.
- Participant presentations, feedback, and action planning.
