PPP Project Recovery Strategies Training Course

Professional Development Training Course Outline

Category	General Training	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Public-Private Partnership Project Recovery Strategies Training Course provides a practical and strategic framework for diagnosing, stabilizing, restructuring, and recovering underperforming Public-Private Partnership projects. The course focuses on Public-Private Partnership project recovery, distressed infrastructure projects, contract restructuring, financial recovery, risk management, stakeholder engagement, performance improvement, dispute resolution, and project governance. Participants will learn how to identify early warning indicators, conduct comprehensive project health assessments, develop recovery plans, restore operational performance, and protect public value while maintaining commercial viability.

The course integrates global best practices, data-driven project diagnostics, financial modelling, contract management, negotiation strategies, institutional governance, and crisis management. Through practical exercises and international case studies, participants will examine how governments, private partners, lenders, regulators, and project stakeholders can collaborate to recover troubled Public-Private Partnership projects. Emphasis is placed on sustainable project turnaround, value-for-money protection, service continuity, resilience, transparency, and long-term infrastructure performance.

Public-Private Partnership Project Recovery Strategies Training Course

Introduction

Public-Private Partnership Project Recovery Strategies Training Course provides a practical and strategic framework for diagnosing, stabilizing, restructuring, and recovering underperforming Public-Private Partnership projects. The course focuses on Public-Private Partnership project recovery, distressed infrastructure projects, contract restructuring, financial recovery, risk management, stakeholder engagement, performance improvement, dispute resolution, and project governance. Participants will learn how to identify early warning

indicators, conduct comprehensive project health assessments, develop recovery plans, restore operational performance, and protect public value while maintaining commercial viability.

The course integrates global best practices, data-driven project diagnostics, financial modelling, contract management, negotiation strategies, institutional governance, and crisis management. Through practical exercises and international case studies, participants will examine how governments, private partners, lenders, regulators, and project stakeholders can collaborate to recover troubled Public-Private Partnership projects. Emphasis is placed on sustainable project turnaround, value-for-money protection, service continuity, resilience, transparency, and long-term infrastructure performance.

Course Objectives

By the end of this course, participants will be able to:

1. Apply advanced Public-Private Partnership project recovery strategies and turnaround frameworks.
2. Diagnose financial, operational, contractual, and governance failures.
3. Identify early warning indicators and emerging project distress.
4. Conduct comprehensive Public-Private Partnership project health assessments.
5. Develop evidence-based project recovery and restructuring plans.
6. Strengthen risk allocation, mitigation, and contingency planning.
7. Apply financial restructuring and commercial recovery techniques.
8. Improve contract management, renegotiation, and dispute resolution.
9. Strengthen stakeholder communication and collaborative decision-making.
10. Restore project performance, service quality, and operational efficiency.
11. Apply data analytics and performance monitoring to recovery programs.
12. Protect public value, value for money, and fiscal sustainability.
13. Establish sustainable post-recovery governance and performance frameworks.

Organizational Benefits

- Reduced financial and operational losses from distressed Public-Private Partnership projects
- Improved project performance and service delivery
- Stronger risk management and early-warning systems
- Enhanced contract and concession management
- Better stakeholder coordination and accountability
- Improved financial sustainability and investment confidence
- Stronger governance and regulatory oversight
- More effective project restructuring and turnaround decisions
- Protection of public value and value for money
- Improved resilience of infrastructure investment portfolios

Target Audiences

1. Public-Private Partnership unit directors, managers, and specialists
2. Government infrastructure and finance officials
3. Project managers and program management professionals
4. Private-sector concessionaires and investors

5. Infrastructure financiers, lenders, and investment professionals
6. Legal, contract, and procurement specialists
7. Regulators and public-sector oversight professionals
8. Consultants, advisors, engineers, and infrastructure specialists

Course Duration: 5 days

Course Modules

Module 1: Public-Private Partnership Project Distress and Recovery Fundamentals

- Understanding Public-Private Partnership project distress and failure patterns
- Identifying financial, operational, contractual, and governance problems
- Project recovery lifecycle and turnaround principles
- Early-warning indicators and project health diagnostics
- Recovery decision-making and escalation frameworks
- Global case study: Recovery lessons from distressed infrastructure concessions

Module 2: Public-Private Partnership Project Health Assessment and Root-Cause Analysis

- Comprehensive project performance assessment
- Root-cause analysis and failure mapping
- Financial, technical, operational, and contractual diagnostics
- Performance benchmarking and gap analysis
- Data-driven project recovery assessments
- Global case study: Infrastructure project diagnostic and turnaround experience

Module 3: Financial Recovery and Commercial Restructuring

- Financial distress analysis and cash-flow assessment
- Revenue optimization and cost-reduction strategies
- Debt restructuring and financing considerations
- Commercial viability and financial model reassessment
- Investment recovery and fiscal-risk management
- Global case study: Financial restructuring of a distressed infrastructure Public-Private Partnership

Module 4: Contract Restructuring and Renegotiation

- Contract performance assessment and concession review
- Identifying contractual bottlenecks and risk imbalances
- Renegotiation principles and restructuring options
- Claims management and dispute prevention
- Legal, regulatory, and compliance considerations

- Global case study: Public-Private Partnership concession renegotiation and recovery

Module 5: Operational Turnaround and Performance Improvement

- Operational performance recovery strategies
- Service-quality improvement and continuity planning
- Asset management and maintenance recovery
- Key performance indicators and performance-based management
- Technology, automation, and data analytics for recovery
- Global case study: Operational turnaround of an underperforming infrastructure project

Module 6: Stakeholder Management and Crisis Communication

- Stakeholder mapping and influence analysis
- Government, private partner, lender, and community coordination
- Crisis communication and reputation management
- Negotiation and collaborative problem-solving
- Transparency, accountability, and public confidence
- Global case study: Stakeholder-led recovery of a troubled Public-Private Partnership project

Module 7: Governance, Risk Management, and Recovery Implementation

- Recovery governance structures and accountability
- Risk identification, allocation, and mitigation
- Recovery action plans, milestones, and responsibilities
- Monitoring, reporting, and escalation mechanisms
- Change management and organizational resilience
- Global case study: Governance reforms supporting Public-Private Partnership project recovery

Module 8: Sustainable Recovery and Post-Recovery Management

- Developing sustainable Public-Private Partnership recovery strategies
- Post-recovery performance monitoring and assurance
- Lessons learned and institutional knowledge management
- Long-term resilience and continuous improvement
- Recovery exit strategies and future risk prevention
- Global case study: Successful transition from project recovery to sustainable performance

Training Methodology

- Instructor-led presentations and interactive technical discussions

- Practical Public-Private Partnership project recovery exercises and diagnostic workshops
- Group-based scenario analysis and problem-solving activities
- Financial, contractual, operational, and risk assessment simulations
- International Public-Private Partnership case studies and lessons-learned analysis
- Role-play exercises covering negotiations and stakeholder management
- Project recovery planning and implementation exercises
- Question-and-answer sessions, peer learning, and facilitated discussions
