Training Course on Electrical Demand-Side Management (EDSM)

Professional Development Training Course Outline

Category	Engineering	**Duration**	10 Days
Base Fee	$3,000 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

In today's energy-conscious world, *Electrical Demand-Side Management (EDSM)* has emerged as a critical strategy for optimizing electricity consumption, enhancing grid reliability, and lowering energy costs. As global energy demands continue to rise, utility companies, industries, and residential users are seeking effective methods to manage and reduce energy usage during peak hours. EDSM plays a vital role in facilitating energy efficiency, load shifting, and smart grid integration, ensuring sustainability in power systems. Training Course on Electrical Demand-Side Management (EDSM) provides a comprehensive overview of the tools, technologies, and best practices in electrical demand-side management, preparing participants for the future of intelligent energy management.

This high-impact training equips learners with cutting-edge insights into energy load profiling, smart metering systems, real-time demand response strategies, and regulatory frameworks shaping EDSM globally. From advanced data analytics to IoT integration and AI-based load forecasting, this course bridges the gap between theoretical knowledge and practical implementation. Whether you are an energy professional, utility planner, facility manager, or a sustainability advocate, this course provides the essential know-how to lead energy innovation.

Programme Curriculum

Training Course on Electrical Demand-Side Management (EDSM)

Introduction

In today's energy-conscious world, *Electrical Demand-Side Management (EDSM)* has emerged as a critical strategy for optimizing electricity consumption, enhancing grid reliability, and lowering

energy costs. As global energy demands continue to rise, utility companies, industries, and residential users are seeking effective methods to manage and reduce energy usage during peak hours. EDSM plays a vital role in facilitating energy efficiency, load shifting, and smart grid integration, ensuring sustainability in power systems. Training Course on Electrical Demand-Side Management (EDSM) provides a comprehensive overview of the tools, technologies, and best practices in electrical demand-side management, preparing participants for the future of intelligent energy management.

This high-impact training equips learners with cutting-edge insights into energy load profiling, smart metering systems, real-time demand response strategies, and regulatory frameworks shaping EDSM globally. From advanced data analytics to IoT integration and AI-based load forecasting, this course bridges the gap between theoretical knowledge and practical implementation. Whether you are an energy professional, utility planner, facility manager, or a sustainability advocate, this course provides the essential know-how to lead energy innovation.

Course Objectives

1. Understand the fundamentals of Electrical Demand-Side Management (EDSM)
2. Analyze real-time energy load forecasting techniques
3. Explore smart grid technologies and their impact on demand response
4. Learn IoT applications in energy efficiency
5. Study AI-powered predictive maintenance for optimized energy use
6. Implement energy-saving strategies for peak load management
7. Evaluate energy storage integration in demand-side management
8. Identify regulatory policies for demand-side initiatives
9. Design cost-effective energy audit frameworks
10. Apply blockchain in decentralized energy systems
11. Examine carbon footprint reduction methods through EDSM
12. Enhance facility operations with smart metering analytics
13. Create data-driven EDSM reports and dashboards

Target Audiences

1. Electrical Engineers
2. Utility Company Professionals
3. Energy Auditors
4. Smart Grid Technicians
5. Sustainability Officers
6. Power System Planners
7. Facility/Energy Managers
8. Government and Policy Makers

Course Duration: 10 days

Course Modules

Module 1: Introduction to EDSM

- Definition and Importance
- Historical Background
- Global EDSM Trends
- Energy Demand vs Supply
- Overview of DSM Programs

Module 2: Energy Load Profiling

- Load Curve Analysis
- Time-of-Use Patterns
- Forecasting Models
- Seasonal Demand Shifts
- Load Profiling Tools

Module 3: Smart Grids and EDSM

- Grid Modernization
- Two-Way Communication
- Distributed Energy Resources
- Grid Stability & EDSM
- Real-Time Monitoring

Module 4: Smart Meters & IoT

- Smart Meter Functions
- Internet of Things Overview
- Data Collection Techniques
- Remote Monitoring
- User Behavior Analytics

Module 5: Peak Load Management

- Load Shaving & Shifting
- Time-Based Tariff Design
- Thermal Energy Storage
- Load Control Devices
- Demand Curtailment Plans

Module 6: Energy Efficiency Strategies

- Energy Saving Techniques
- Retrofitting Technologies
- Behavioral Efficiency Programs
- High-Efficiency Appliances
- Lighting & HVAC Controls

Module 7: Demand Response Mechanisms

- DR Program Types
- Price-Based vs Incentive-Based DR
- Automation in DR
- User Engagement Tools
- Case Studies

Module 8: Renewable Energy & EDSM

- Solar and Wind Integration
- Net Metering
- Storage Technologies
- Distributed Energy Resources
- Challenges and Opportunities

Module 9: Energy Analytics and AI

- Big Data in Energy
- Machine Learning Models
- Predictive Analytics
- Energy Forecasting Tools
- AI in Fault Detection

Module 10: Regulatory Frameworks

- National EDSM Policies
- Incentives and Rebates
- ISO and IEC Standards
- Compliance Procedures
- Global Best Practices

Module 11: Energy Auditing

- Audit Planning
- Data Collection Methods
- Energy Use Evaluation
- Audit Reporting Tools
- Implementation Roadmaps

Module 12: Sustainability & Carbon Management

- Measuring Carbon Footprints
- Emissions Reduction Tactics
- Corporate Sustainability Metrics
- Green Building Integration
- Reporting and Disclosure

Module 13: Blockchain & EDSM

- Basics of Blockchain
- Peer-to-Peer Energy Trading
- Data Transparency
- Cybersecurity in Energy
- Future of Energy Transactions

Module 14: EDSM Implementation Planning

- Stakeholder Engagement
- Project Budgeting
- Performance Metrics
- Pilot Projects
- Scaling Strategies

Module 15: Case Studies and Future Trends

- Global Success Stories
- Challenges and Lessons Learned
- Innovation Trends
- Evolving Consumer Behavior
- The Future of EDSM

Training Methodology

- Interactive lectures
- Real-world case studies
- Group discussions
- Hands-on tools
- Simulation exercises

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call *+254769199797*

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
23 Nov 2026	04 Dec 2026	Online	$2,000
23 Nov 2026	04 Dec 2026	Physical	$3,000
23 Nov 2026	04 Dec 2026	Physical	$6,000
23 Nov 2026	04 Dec 2026	Physical	$6,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
23 Nov 2026	04 Dec 2026	Physical	$9,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
23 Nov 2026	04 Dec 2026	Physical	$12,000
