Veterinary Toxicology Training Course

Professional Development Training Course Outline

Category	Veterinary and Animal Science	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Veterinary Toxicology Training Course is designed for veterinary professionals, animal health specialists, and researchers aiming to deepen their expertise in animal poisoning, toxic agents, and clinical interventions. This course offers a practical, evidence-based approach to identifying, managing, and preventing toxic exposures in domestic and exotic animals. Through interactive sessions, case-based learning, and real-world simulations, participants will gain a comprehensive understanding of pharmacotoxicology, environmental toxins, plant and chemical poisoning, and the latest diagnostic and therapeutic techniques.

Participants will be equipped with the skills to analyze toxicological incidents, implement preventive strategies, and conduct risk assessments in veterinary practice. The program emphasizes current trends in veterinary toxicology, including emerging contaminants, drug interactions, and wildlife toxicology. By integrating practical laboratory exercises, digital simulations, and collaborative discussions, this course ensures professionals can apply theoretical knowledge directly to clinical and field scenarios, enhancing animal safety, public health, and regulatory compliance.

Programme Curriculum

Veterinary Toxicology Training Course

Introduction

Veterinary Toxicology Training Course is designed for veterinary professionals, animal health specialists, and researchers aiming to deepen their expertise in animal poisoning, toxic agents, and clinical interventions. This course offers a practical, evidence-based approach to identifying, managing, and preventing toxic exposures in domestic and exotic animals. Through interactive sessions, case-based learning, and real-world simulations, participants will gain a comprehensive understanding of pharmacotoxicology, environmental toxins, plant and

chemical poisoning, and the latest diagnostic and therapeutic techniques.

Participants will be equipped with the skills to analyze toxicological incidents, implement preventive strategies, and conduct risk assessments in veterinary practice. The program emphasizes current trends in veterinary toxicology, including emerging contaminants, drug interactions, and wildlife toxicology. By integrating practical laboratory exercises, digital simulations, and collaborative discussions, this course ensures professionals can apply theoretical knowledge directly to clinical and field scenarios, enhancing animal safety, public health, and regulatory compliance.

Course Duration

5 days

Course Objectives

1. Master identification and classification of common veterinary toxins.
2. Understand mechanisms of toxicity and pathophysiology in animals.
3. Develop skills in diagnostic toxicology and laboratory interpretation.
4. Apply risk assessment and prevention strategies for toxic exposures.
5. Analyze case studies of plant, chemical, and drug-induced poisoning.
6. Implement therapeutic interventions and emergency management protocols.
7. Explore environmental and industrial toxins affecting livestock and pets.
8. Recognize emerging contaminants and global toxicology trends.
9. Integrate wildlife and exotic animal toxicology principles into practice.
10. Conduct veterinary forensic toxicology and reporting.
11. Utilize digital tools and software for toxicology analysis.
12. Enhance client communication and education on toxin prevention.
13. Promote public health and regulatory compliance in veterinary practice.

Target Audience

1. Veterinarians (small and large animal practice)
2. Veterinary students and interns
3. Animal health technicians
4. Wildlife veterinarians
5. Laboratory toxicologists
6. Veterinary researchers
7. Regulatory and public health officers
8. Animal welfare and rescue organization professionals

Course Modules

Module 1: Introduction to Veterinary Toxicology

- Overview of veterinary toxicology principles
- Classification of toxins (chemical, biological, environmental)
- Routes of exposure and absorption
- Dose-response relationships and toxicity thresholds
- **Case Study:** Household toxin ingestion in dogs

Module 2: Plant and Natural Toxins

- Identification of toxic plants for livestock and pets
- Clinical signs and pathophysiology
- Laboratory diagnostics for plant poisoning
- Treatment and management protocols
- **Case Study:** Oleander poisoning in horses

Module 3: Chemical and Industrial Toxins

- Pesticides, herbicides, and rodenticides toxicity
- Heavy metal exposure in animals
- Industrial chemical hazards
- Preventive measures and risk assessment
- **Case Study:** Lead poisoning in dairy cattle

Module 4: Pharmaceutical and Drug Toxicity

- Drug-induced toxicity in companion animals
- NSAIDs, antibiotics, and chemotherapeutics
- Drug interactions and overdose management
- Monitoring and supportive care strategies
- **Case Study:** Ibuprofen toxicity in dogs

Module 5: Foodborne and Environmental Toxicology

- Mycotoxins and contaminated feed
- Waterborne toxins and algae poisoning
- Environmental pollutants affecting livestock and wildlife
- Diagnostic techniques and management
- **Case Study:** Aflatoxin contamination in poultry

Module 6: Emergency Toxicology and Critical Care

- Triage and stabilization of poisoned animals
- Decontamination methods
- Antidotes and pharmacologic interventions
- Monitoring and prognosis assessment
- **Case Study:** Organophosphate pesticide poisoning in dogs

Module 7: Wildlife and Exotic Animal Toxicology

- Common toxins in wildlife and exotic pets
- Field diagnostic approaches
- Conservation toxicology principles
- Rehabilitation and treatment protocols
- **Case Study:** Lead shot poisoning in waterfowl

Module 8: Forensic and Regulatory Veterinary Toxicology

- Principles of veterinary forensic toxicology
- Sample collection and chain-of-custody
- Legal and ethical considerations
- Reporting and documentation standards

- **Case Study:** Forensic investigation of dog poisoning

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
23 Nov 2026	27 Nov 2026	Online	$1,000
23 Nov 2026	27 Nov 2026	Physical	$1,500

Start Date	End Date	Location	Price
23 Nov 2026	27 Nov 2026	Physical	$3,000
23 Nov 2026	27 Nov 2026	Physical	$3,000
23 Nov 2026	27 Nov 2026	Physical	$6,000
23 Nov 2026	27 Nov 2026	Physical	$4,500
23 Nov 2026	27 Nov 2026	Physical	$6,000
23 Nov 2026	27 Nov 2026	Physical	$6,000
